## Boundary

## by Warren L. Molton in the March 4, 2015 issue

I often arrive at a boundary that leaves me at the gate at a time to fish or cut bait or just wait at the border of this or that for better or worse perform or rehearse

begin again or end-

on my mark to there,

at the finish from *where*.

And that's when I need some now-or-never word, as when Jesus sat with the woman at the well waiting for a snarl of men to stone her, and reach out to her writing something in the sand for her for them and wrote again, then spoke his boundary-breaking words piercing to the bone that would kill their will and let them all go home.
